The Synergy Advantage

The Synergy Advantage is science: Our **ADVANCED POLYMER TECHNOLOGY** makes Synergy Solutions' proprietary formulations perform better, faster and longer lasting than the competition. The difference is visible and lasting.

Advanced Polymer Technology

Traditional products use a two-step approach involving acids and harsh chemicals, which are more expensive and less effective. Our products use one-step polymer technology that traps dirt in a bubble, allowing dirt to be easily rinsed away from your car without using harsh chemicals.

Synergy Solutions manufactures a comprehensive line of car wash chemicals, specializing in polymer-based and non-corrosive products, to achieve superior results using less product.

While commonly corrosive traditional detergents clean by attacking dirt, which can damage the vehicle surface, Synergy Solutions' non-caustic based detergents lift dirt away from the surface using a molecular chain to attract dirt up to the polymer and then encapsulate it, so dirt is not redeposited. The result is easy rinsing leaving a clean and shiny surface.

Made for Car Wash People, by Car Wash People

Synergy Solutions brings comprehensive capabilities and first-hand experience, to understand every aspect of a car wash operator's challenges and needs.

Experience

Four decades of blending car wash products

Service

Accountable to thousands of car wash operators, including national oil accounts

Ownership

With its own full-service, exterior, touchless automatics, and self-serve car washes, Synergy Solutions is uniquely positioned to realize the car wash operator's day-to-day needs for efficiency, economy, and reliability

Our expertise drives the journey from the initial formulation to the moment a freshly washed car leaves the customer's lot, ensuring excellence every step of the way.

SYNERGY Synergy Advantage

Our Promise: Quality, Reliability, Affordability

We develop all of our proprietary formulations at an on-site laboratory. We test every product batch and retain samples of all shipped products.

All of Synergy Solutions' chemicals are of the highest quality, manufactured to strict quality control standards, so you can be confident of the consistency in every drum we supply.

We offer our product line at extremely competitive pricing, affording the car wash operator the opportunity to **buy the best for less.**

Fast-Drying, Clean, and Shiny Finish

Unlike traditional detergents that rely on harsh, corrosive chemicals to break down dirt—often at the expense of the vehicle's surface—Synergy Solutions' advanced, non-corrosive formulas work smarter, not harsher. Our innovative molecular chain technology attracts and lifts dirt away from the surface, encapsulating it for effortless rinsing. The result? A pristine, damage-free clean with a brilliant shine. Plus, our premium spray protectants and drying agents deliver unmatched gloss and superior drying performance, ensuring every vehicle leaves looking its absolute best.

SYNERGY

Extreme Pack & Easy-Chem Station

EXTREME PACK™

Synergy Solutions Extreme Pack™: The Most Extreme Concentrate on the Market Today

No Acid Needed, Non-Corrosive, UPS Shippable

Extreme Pack's™ easy-to-store 2.5 gallon containers pack premium cleaning power and unbeatable shine into a compact container.

Dump the Drum. Start Saving.

Space | Store Extreme Pack™ 2.5 gallon containers on a shelf and free up the 55-gallon drum footprint to create a cleaner, more spacious equipment room

Ease of Use | Anyone can easily handle, store and refill the 2.5 gallon containers used with the Extreme Pack Station™ 12.5 gallon reservoir

Costs | Using smaller 2.5 gallon containers translates into savings on shipping, container cost, and blending expenses

EASY TO CONVERT AND INSTALL

Synergy Solutions' Extreme Pack Station™ is simple to maintain, easy to convert to, and simple to install. It includes:

Foot valve that is built into chemical pickup line

One 12.5 gallon reservoir that will hold five 2.5 gallon containers

Each Extreme Pack™ 5 gallon refill pack contains two 2.5 gallon easy-pour containers

Extreme Pack™ Product Line

- PRESOAKS
- LUBRICANTS/DETERGENTS
- PROTECTANTS
- DRYING AGENTS
- TIRE CLEANERS

SYNERGY Extreme Pack

PRESOAKS

Our best-selling, high-performance presoak delivers exceptional cleaning power in both single-step and two-step processes. With 4x the concentration, Wildfire™ ensures superior dirt and grime removal while providing easier handling and significant cost savings. When paired with our Extreme Pack™ Ignite™ alkaline booster, it becomes the ultimate cleaning solution, effortlessly breaking down tough residues. Engineered for maximum effectiveness on both windshields and vehicle surfaces, Wildfire™ sets the standard for industry-leading presoak performance.

This advanced 1-step polymer presoak is engineered to simplify the wash process and outperform traditional methods. By eliminating surface charge, it removes the need for a neutralizing step—reducing chemical use while maximizing cleaning power. Its cutting-edge formula lifts and releases dirt without redepositing, ensuring a pristine, spotless surface and faster rinsing. It is extremely effective on pesky “eyebrows” and is safer for both operators and vehicles – delivering unmatched results.

The ultimate one-step polymer presoak, eliminates the need for surface neutralization, ensuring superior rinseability and a spotless finish. Powered by Advanced Polymer Technology™, it prevents dirt redeposition while enhancing dryness and water shedding. Safe, non-corrosive, and eco-friendly, which delivers powerful cleaning with less product, redefining efficiency in car wash solutions.

This low pH presoak is built for powerful performance, combining a blend of acids and solvents to break through tough mineral buildup and road film. Designed to complement high pH presoaks in a two-step wash process. This high foaming presoak formula delivers excellent surface brightening and rinseability, making it a reliable choice for cleaning efficiency and preparing vehicles for a flawless finish.

This hyper-concentrated presoak designed for a two-step low pH/high pH wash process, Extreme Pack™ Power Prep™ uses high-quality **low pH** acids to emulsify, neutralize, and break down dirt and grime. Its powerful formula enhances wash performance and significantly reduces windshield eyebrows for a cleaner, more polished finish.

This ultra-concentrated presoak is engineered for versatility and exceptional performance in challenging cleaning environments. Formulated with a high level of powerful solvents, it effectively targets and breaks down stubborn oil films and grime caused by road contaminants. Its high-foaming action enhances surface coverage and dwell time, helping to lift and loosen tough contaminants for a more effective clean. Ideal for both touch-free and friction applications, it performs consistently whether used on its own or as part of a two-step process—delivering a cleaner surface and better prep for downstream chemistry.

The industry's first triple-color presoak, Extreme Pack™ Unicorn™ delivers an effective clean with Advanced Polymer Technology™. Its triple-foam formula enhances cleaning power, reducing wash time and increasing vehicle throughput when paired with a first pass presoak. Ideal for lava arches, triple-color pods, and self-serve applications, unicorn™ adds vibrant color and a refreshing fragrance for an enhanced customer experience.

Our concentrated, high-foaming presoak, Liquid Blaze™ features a striking color designed specifically for foaming curtains. Ideal as an added service, it enhances visual appeal while providing excellent cleaning power and improved rinseability.

A high-pressure concentrate that delivers powerful cleaning with rich suds, balanced alkalinity, and strong visual appeal. Extreme Pack™ Detail Prep is ideal for

One of our highest-concentrated clear coat protectants and cheater waxes, delivering instant drying and extreme water repellency at usage rates as low as 4 mL per car. Engineered to perform in any environment, it aggressively breaks surface tension to force water off the vehicle, leaving a dry, slick finish every time. Designed for maximum efficiency and speed, this ultra-concentrated protectant enhances shine, boosts customer perception, and ensures consistent drying results regardless of wash, environment, or vehicle type.

SYNERGY **Extreme Pack**

LUBRICANTS / DETERGENTS

EXTREME PACK™ **CLEAR COAT CONDITIONER**

Our highly concentrated, pH-balanced surface treatment that enhances shine and protection. Applied through foamers, it delivers excellent rinsing and lubricating properties for a smooth, polished finish.

EXTREME PACK™ **FlexFoam**

One of the most concentrated detergents on the market, delivering powerful cleaning with minimal product use. Versatile and effective, it works as a conditioner, in foam brushes, or any high-foaming application. Its vibrant color and refreshing cherry scent enhance the wash experience while ensuring superior performance.

EXTREME PACK™ **Foam Brush**

This hyper-concentrated lubricant detergent is designed for self-service brush applications. Its powerful cleaning agents provide excellent lubrication, ensuring a smooth, effective wash while protecting vehicle surfaces.

EXTREME PACK™ **Ultra SudZ**

Extreme Pack™ Ultra SudZ™ delivers a rich, high-foam lather for superior cleaning and rinseability in all cloth washes. Its highly concentrated formula enhances lubrication, protecting mirrors, antennas, and license plates while ensuring a smooth, damage-free wash.

EXTREME PACK™ **SILK**

The ultimate high-foaming triple-color conditioner designed for high-friction applications. Its advanced formula provides exceptional lubrication, ensuring smooth operation and superior performance. The vibrant triple-color foam enhances the customer experience while delivering a thorough, high-quality clean.

PROTECTANTS

EXTREME PACK™ **Aqua Guard**

Our staple premium protectant with ceramic-like properties, delivering a deep, high-gloss shine. Engineered to enhance water beading and drying efficiency, it reduces surface tension, allowing water to roll off effortlessly. When paired with one of our polymer presoaks, Extreme Pack™ AquaGuard™ provides superior protection and a showroom-quality finish.

EXTREME PACK™ **Aqua Guard** Foaming Protectant

Delivers the same premium protection as Extreme Pack™ AquaGuard™ with the added visual appeal of thick, colorful foam. It enhances water repellency, produces an ultra-high gloss shine, and leaves a finish that looks hand-waxed. Perfect for premium service offerings, it provides long-lasting protection and a stunning customer experience.

EXTREME PACK™ **Berry PolyShine**

An ultra-concentrated, polymer-based, protectant that enhances and preserves all car surfaces. Its advanced formula provides a durable protective coating with a brilliant high-gloss finish while also serving as an effective drying aid due to its exceptional water-repelling properties. Ideal for both tunnels, IBA, and self-serve applications, it delivers long-lasting shine and protection.

EXTREME PACK™ **GlistenMAX**

This premium foaming carnauba sealer wax delivers a deep, mirror-like shine and long-lasting surface protection. Infused with high-quality carnauba and a vibrant lemon scent, it produces rich yellow foam and excellent water-repelling properties. This customer premium offering is ideal for hot wax applications and performs exceptionally well in tunnels and IBAs.

EXTREME PACK™ **MAGNA POLISH**

Extreme Pack™ Magma Polish™ is a highly concentrated, rich-foaming polish that delivers a brilliant shine and enhanced protection. Designed as a "flash wax," it provides excellent rinseability while leaving a smooth, glossy finish that enhances vehicle appearance and durability.

SYNERGY CERAMICS

Extreme Pack

Our best-performing, top-tier ceramic sealant, delivering one of the deepest, longest-lasting shines in the car wash industry. Engineered to bond at a molecular level, it creates a durable protective layer that lasts for weeks. Its advanced formula enhances water beading and drying efficiency, reducing surface tension so water rolls off effortlessly. For unmatched ceramic protection and brilliance, Extreme Pack™ CeramiGuard™ sets the standard.

Our top-selling, highest-performing protectant, combining graphene with Advanced Polymer Technology™ for unmatched durability and shine. It outperforms ceramic and traditional protectants, delivering a longer-lasting, high-gloss finish. Engineered for superior water resistance, it increases the contact angle of water molecules, ensuring effortless drying and the driest shine in car washing. Elevate your service with the ultimate in protection and performance.

Our foaming ceramic sealant offering that enhances protection with a vibrant, visually appealing foam. Its advanced formula bonds to the vehicle's surface, creating a durable, long-lasting shine with a smooth, silk-like finish. Designed for both protection and show-stopping appeal, it elevates the wash experience while delivering superior performance.

DRYING AGENTS

Our foaming ceramic sealant offering that enhances protection with a vibrant, visually appealing foam. Its advanced formula bonds to the vehicle's surface, creating a durable, long-lasting shine with a smooth, silk-like finish. Designed for both protection and show-stopping appeal, it elevates the wash experience while delivering superior performance.

TIRE / SPECIALTY PRODUCTS

This non-corrosive wheel and tire cleaner is designed for self-serve applications and air-injected foaming systems. Its powerful formula effectively removes dirt and grime while providing a visually appealing foam for an enhanced customer experience.

The best-selling wheel and tire cleaner, this highly concentrated, non-corrosive formula is designed for all wheel types, including chrome, aluminum, and magnesium, as well as whitewall tires. It effortlessly removes brake dust and restores whitewalls to a bright, clean finish. Simply spray on and rinse off for outstanding results.

Powered by Advanced Polymer Technology™, this highly effective bug remover safely penetrates and softens stubborn bug remains for effortless removal. Its advanced formula ensures thorough cleaning while being safe for vehicle surfaces.

This highly concentrated liquid corrosion preventative provides superior protection for the underside of vehicles. Its advanced formula creates a durable barrier against moisture, salt, and road debris, helping to extend the life of critical components.

Revitalize your car's clean and shine with our Extreme Pack™ Ignite™ Alkaline Booster. Specially formulated to tackle stubborn dirt and grime, this powerful cleaner enhances the overall cleanliness of your vehicle when paired with our cutting-edge polymer technology, making even the toughest spots easy to clean. Enjoy a spotless and gleaming finish with our True One Step™ technology.

The ultimate defense against corrosive winter salt, this advanced formula neutralizes road salt on contact, preventing rust and corrosion before it begins. Easy to apply and safe for all vehicle surfaces, it helps maintain a pristine, rust-free finish throughout harsh winter conditions while extending the life of critical components.

SYNERGY Presoaks

Synergy Solutions' Car Wash Presoaks

Engineered Chemistry | Higher quality raw materials are formulated to attack dirt, rather than positively charge the surface of the car. Our solutions eliminate extremely high pH solutions and the need for a low pH product to help neutralize the car surface.

Superior Rinse | Non-reaction car wash presoak does not charge the surface of the car, making rinse-ability more efficient and effortless. Less surface-tension friction allows a cleaner rinse and minimizes spotting.

Cleaner Cars | Our car wash presoaks provides superior cleaning on a variety of materials: painted surface, glass, rubber, chrome, and plastic. In most cases, it is used as a one-step application.

Safe Car Wash Chemistry | Over 95% of our products are classified as non-corrosive and non-caustic. Our car wash chemical technology is designed to attack dirt and road film while leaving the car surface, passengers, and the environment intact.

Economical Car Wash Solutions | With a higher dilution than most products on the market, Synergy Solutions' products yield more productivity and superior results at a lower overall cost to the car wash operator.

FRICTION AND TOUCH-FREE WASHES

Viper

This True One Step™ advanced polymer presoak eliminates the need for surface neutralization, ensuring superior rinseability and a spotless finish. Its innovative formula prevents dirt redeposition, a common issue with traditional two-step approaches. Powered by Advanced Polymer Technology™, it enhances dryness with or without drying aids while being safe for operators, vehicles, and the environment. Its non-corrosive nature and efficient cleaning power make it a game-changer in car wash solutions.

RED LIGHTNING

This fast-acting presoak is designed to tackle tough dirt and grime with ease. Versatile for both single-step and two-step processes, it works effectively in combination with low pH products to deliver a powerful, thorough clean.

Image Plus

This powerful high pH liquid is designed for both friction and touch-free washes, delivering exceptional cleaning performance in the toughest conditions. Its advanced formula enhances rinseability and shine while ensuring the vehicle's surface remains neutral for a spotless, streak-free finish.

Spectrum

This high pH concentrated presoak delivers powerful cleaning performance across a variety of environments. Its advanced formula effectively breaks down tough dirt and grime, making it a versatile solution that excels in both friction and frictionless wash settings for a superior clean.

Spectrum-X

This high pH concentrated presoak delivers the same powerful cleaning performance as Spectrum™ with the added benefit of enhanced foam for high-foaming applications. Designed for both friction and frictionless wash settings, it provides increased lubricity for smoother cleaning action and greater visual appeal, creating an improved experience for customers while ensuring a superior clean.

WildFire

Our top-selling presoak, this fast-acting, concentrated formula delivers powerful cleaning as a True One Step™ presoak. Engineered with Advanced Polymer Technology™, it excels in touch-free environments, effortlessly breaking down tough dirt and road grime for a spotless finish.

SYNERGY

Presoaks

Cherry Prep

RED

This high pH presoak is designed for self-serve presoak applications, delivering exceptional cleaning power with rich, high-foaming action. Ideal for self-serve environments, it effectively breaks down dirt and grime while enhancing the customer experience with its thick foam coverage.

Polymer Plus

One of our original, time-tested formulations, this high pH concentrated liquid presoak is designed for touch-free cleaning in automatic and tunnel car washes. Its proven formula effectively removes dirt and grime while enhancing rinseability, ensuring a thorough and efficient clean without the need for friction.

Grime-A-Way

This extremely cost-effective, polymer-based high pH presoak delivers powerful cleaning performance while remaining non-corrosive. With excellent foaming action and superior dirt removal, it provides an efficient and affordable solution for maintaining a spotless vehicle.

Liquid Blaze

BLUE

RED

This high-foaming presoak is specially designed for foaming curtains, creating an eye-catching experience for customers. It enhances visual appeal as an added service while delivering excellent cleaning power and improved rinseability for a more effective wash experience.

FORCE

This powerful high pH presoak is specially formulated to perform in hard water conditions, even without a softener. Engineered with advanced water softening agents, it effectively combats water hardness while breaking down tough dirt and grime. Designed for both friction and frictionless machines, it ensures a deep, consistent clean in any

TWO STEP PRODUCTS APPLICATIONS

POWER PREP™

Designed for a two-step low pH/high pH wash process, this presoak uses high-quality low pH acids to emulsify, neutralize, and break down dirt and grime in friction or frictionless wash systems. Its advanced formula significantly reduces windshield eyebrows, ensuring a cleaner, more polished finish.

ECO PREP

As our economy solution in low pH presoaks, this formula combines a specialized blend of acids and emulsifiers for use in a two-step presoak process. It delivers effective cleaning while neutralizing the vehicle's surface, significantly reducing windshield eyebrows.

SELF-SERVE APPLICATIONS

Purple Prep

This high-foaming presoak is designed for self-serve applications, delivering powerful cleaning performance. It quickly breaks down road soils, oils, grime, and bugs, ensuring an effective and efficient wash experience.

BLUE POWER

This premium high-pressure detergent concentrate delivers a powerful combination of high suds, alkalinity, and visual appeal for superior cleaning performance. Designed for both tunnel and self-service washes, it ensures effective dirt removal while enhancing the overall wash experience.

Lubricity | Our car wash detergent is formulated to reduce friction between the cloth and car surface.

Does Not Charge the Car's Surface | Which aids the effectiveness of drying agent and waxes.

Superior Rinse | Non-reaction car wash detergent does not charge the surface of the car, making rinse-ability more efficient and effortless. Less surface-tension friction allows a cleaner rinse and minimizes spotting.

High Foam | Offers high visual experience and great customer experience.

Cleaner Cars | Our car wash base detergent provides superior cleaning on a variety of materials: painted surface, glass, rubber, chrome, and plastic. In most cases, it is used as a one-step.

Safe Car Wash Chemistry | Over 95% of our products are classified as non-corrosive and non-caustic. Our car wash chemical technology is designed to attack dirt and road film while safe for the cars surface, passengers and the environment.

Economical Car Wash Solutions | With a higher dilution than most products on the market, Synergy Solutions' products yield more productivity and superior results at a lower overall cost to the car wash operator.

FRICITION APPLICATIONS

Our premium foam lubricating detergent is designed for all cloth washes, producing a thick, rich lather for superior cleaning and rinseability. Its highly concentrated formula enhances lubrication, helping to protect mirrors, antennas, and license plates while ensuring a smooth, effective wash.

This high-performance lubricating detergent is formulated for friction applications, delivering superior lubrication and cleaning through foamers. Its advanced formula ensures smooth operation while enhancing the overall wash experience.

Part of our economy line, this expertly formulated lubricating detergent delivers effective cleaning and rinsing for friction applications. Designed for use through foamers, it provides a cost-efficient solution while ensuring a smooth, high-quality wash.

This low pH, high-foaming, high-lubricity detergent is designed for high-friction applications, ensuring smooth and effective cleaning. As a cost-effective solution, it provides excellent performance while enhancing the overall wash experience.

SELF-SERVE APPLICATIONS

Foam Brush

This lubricating detergent is formulated for self-service brush applications, providing effective cleaning and smooth brush movement. Its advanced formula ensures a thorough wash while enhancing the overall user experience.

Bubbly Brush

Part of our economical line, this lubricating detergent is designed for self-service brush applications, delivering effective cleaning and smooth operation. It provides a budget-friendly solution without compromising performance, ensuring a quality wash experience.

Winter Foam Brush

This lubricating detergent is specially formulated for self-service applications in sub-freezing conditions. Its advanced formula includes anti-freeze protection, ensuring reliable performance and effective cleaning even in the coldest environments.

SYNERGY **Drying Agents/Protectants**

Exceptional Shine | Our new technology delivers a superior car wash protectant. The shine is so deep; it really looks as if it were hand waxed.

Breaks and Beads | Get the best of both worlds: products with a fast beading action to promote sheeting before the car reaches the dryer, and reduced beading at the end to allow the dryer to remove water more efficiently.

Superior Rinse | Non-reaction car wash drying agents do not charge the surface of the car, making rinse-ability more efficient and effortless. Less surface-tension friction allows a cleaner rinse and minimizes spotting.

Economical Car Wash Solutions | With a higher dilution than most products on the market, Synergy Solutions' products yield more productivity and superior results at a lower overall cost to the car wash operator.

PROTECTANTS

This premium protectant features ceramic-like properties, delivering a deep shine while enhancing water beading for effortless drying. Engineered to decrease the surface area of water molecules and increase the contact angle, it allows water to roll off on contact. For best results, pair with our polymer presoaks to maximize clean and protection.

This premium sealer features high water beading and fast-breaking technology, allowing for quicker drying and a flawless finish. Its advanced formula enhances the vehicle's shine, ensuring a smooth and well-maintained appearance after every wash.

CERAMICS

As our top-performing ceramic sealant, this premium formula delivers one of the deepest, longest-lasting shines in the car wash industry, providing weeks of advanced protection. Its specialized formula bonds at a molecular level, sealing the pores of the vehicle's paint to create a durable, protective layer. Engineered to enhance water beading, it reduces surface tension and increases the contact angle, allowing water to roll off effortlessly for a spotless, high-gloss finish.

This cost-effective ceramic sealant creates a durable protective layer that bonds to the vehicle's surface, enhancing shine and longevity. Its high-performance formula helps repel water and contaminants, providing long-lasting protection and a well-maintained finish at an excellent value.

Fresh Sensation

Fresh Laundry

This sealer is designed to enhance the drying process with advanced water beading and fast-breaking technology. It helps water sheet off quickly, reducing drying time while leaving behind a brilliant, streak-free finish. Ideal for improving the overall wash experience, it delivers a lasting shine that keeps vehicles looking their best.

BLUE SENSATION

A self-serve protectant that offers a deep blue, scented, sudsing protectant. It has a great visual appeal for the customer. Formulated to provide a long-lasting, visible, water-resistant, high gloss appearance on all surfaces.

Cherry PolyShine

This polymer-based protectant is designed to maintain and preserve all car surfaces while providing a high-gloss finish and durable protective coating. As a top-selling option from our non-concentrate line, it delivers reliable performance and long-lasting shine. Ideal for both tunnel, IBA, and self-serve applications, it enhances the wash experience with a smooth, polished look.

DRYING AGENTS

AquaDry

SCENT-FREE

As our premium drying aid, this formula rapidly breaks down water for maximum blower efficiency, delivering a faster and more effective drying process. Its advanced technology reduces labor costs and minimizes wipe downtime, ensuring a streak-free, spot-free finish with every wash.

Bead-Away

SCENT-FREE

Part of our economy line, this innovative solution allows water on the vehicle's surface to lift and separate, enabling the blower to more efficiently bead water off the car. Its advanced formula improves drying time, ensuring a cleaner, drier finish with minimal effort, all while providing a cost-effective drying solution.

PolyShine

SCENT-FREE

A customer favorite, this polymer-based protectant is designed to maintain and preserve all car surfaces, delivering a high-gloss finish while providing a durable protective coating. It also functions as an effective drying agent, enhancing the drying process and leaving vehicles with a smooth, shiny appearance. Known for its outstanding performance and cost-effectiveness, PolyShine™ offers excellent value while meeting the needs of your customers.

SYNERGY

Drying Agents/Protectants

TRI-COLORED FOAMING PRODUCT

Offering the same great protection as AquaGuard™, this foaming version adds visual appeal with vibrant foam and enhanced rinsing properties. It improves gloss and drying efficiency while delivering long-lasting protection for a sleek, polished finish. Ideal for customers looking for both performance and a stunning, eye-catching wash experience.

This rich, concentrated foaming polish delivers a high shine and enhanced protection, acting as a "flash wax" with excellent rinseability. Its advanced formula provides a smooth, glossy finish while ensuring long-lasting protection for vehicle surfaces. Ideal for providing a superior shine and optimal performance.

This advanced foam polish combines cleaning agents and polymeric silicones to enhance gloss and drying capabilities. Applied through foamers, it provides a smooth, glossy finish while accelerating the drying process, ensuring vehicles shine brilliantly and dry quickly.

This pH-balanced surface conditioner is formulated with advanced cleaning agents for effective application through foamers. It provides excellent coverage and rinses incredibly well, enhancing the overall wash process.

Cleaning Ability | Highly effective in cleaning all types of wheel and tire surfaces.

Superior Rinse | Non-reaction car wash wheel / tire cleaners do not charge the surface of the car, making rinse-ability more efficient and effortless. Less surface-tension friction allows a cleaner rinse and minimizes spotting.

Economical Car Wash Solutions | With a higher dilution than most products on the market, Synergy Solutions' products yield more productivity and superior results at a lower overall cost to the car wash operator.

Brite-N-White™

This non-corrosive wheel and tire cleaner is designed for self-serve applications, offering excellent cleaning performance in CTA's and foaming applicators. Its advanced formula effectively removes dirt and grime from wheels and tires, ensuring a spotless, clean finish.

RED SNAPPER™

Our best-selling wheel and tire cleaner, Red Snapper is a higher concentrated, non-corrosive formula designed to clean all types of wheels, including chrome, aluminum, and magnesium, as well as whitewall tires. It effectively removes brake dust and restores whitewalls to their original brightness. Simply spray on and rinse off for a quick, easy clean.

WHEELIE KLEEN

This non-corrosive and economical wheel cleaner delivers high effectiveness while being safe for all wheel types. Part of our economical line, it provides excellent value without compromising on performance, ensuring clean and spotless wheels every time.

Krystal Kleen

This non-corrosive, polymer-based wheel cleaner effectively removes dirt and grime without damaging surfaces. Its advanced formula ensures safe, thorough cleaning for all wheel types, leaving a spotless finish every time.

Icee Blue™

A premium water-based silicone suspension dressing, formulated to perform like a solvent-based dressing. Optimum usage with an in line applicator, Icee Blue's high gloss durability combined with its superior water-repellant properties makes it ideal for inside and outside vehicles.

GLAZED

End your search for the ultimate tire shine with Glazed. Our innovative formula tackles sling and insufficient pad application - two frequent problems found in other tire shines. Glazed bonds seamlessly to rubber, preventing sling and ensuring your customers enjoy a clean, splatter-free experience. Our unique formulation delivers solvent-like results when applied with pads, guaranteeing optimal performance and superior shine.

Introducing our groundbreaking safe and effective bay and wall cleaner formula, featuring our revolutionary Advanced Polymer Technology that is both gentle on the skin and nearly odorless. This innovative solution offers a safe and eco-friendly alternative to hazardous and toxic acids in numerous applications. It excels at eliminating water spots, soap scum, rust, alkaline scale, oils, cement residue, and a variety of other contaminants.

BAY AND WALL CLEANER

This heavy-duty cleaner is formulated with an acid blend that includes hydrofluoric acid to effectively tackle tough stains and contaminants. It provides powerful cleaning for bay and wall surfaces, ensuring a thorough and efficient clean every time.

POLYMER BUG REMOVER

This highly effective bug remover is a safe alternative to hydrofluoric acid. It gently penetrates and softens stubborn bug remains, ensuring easy and thorough removal without damaging the vehicle's surface.

CHASSIS PROTECTANT

This liquid corrosion preventative provides excellent protection for the underside of vehicles. It creates a durable barrier that guards against rust and damage from road salt and other harsh elements, helping to extend the life of critical components.

Window Cleaner

This premium glass cleaner is specially formulated for cleaning automobile windshields in tunnel applications. With a dilution ratio of up to 30:1, it offers exceptional cleaning power, ensuring streak-free, crystal-clear results every time.

InFused™

This custom concentrated liquid water-based scent is designed to leave vehicle interiors with a fresh and lasting fragrance. Available in ready-to-use formulas for spray bottles or fragrance machines, it enhances the vehicle's interior with a pleasant scent, offering an improved customer experience.

LIQUID LAUNDRY DETERGENT

This detergent is ideal for cleaning highly soiled items in both commercial and residential washing machines. Its powerful formula effectively tackles tough stains and dirt, ensuring clean and fresh results every time.

All Purpose Cleaner

This multi-purpose cleaner delivers exceptional performance, effectively removing dirt, oil, grease, and grime from hard surfaces such as plastic, vinyl, and engines. Its versatile formula provides excellent value while ensuring a thorough clean for a wide range of applications.

• TAR & ADHESIVE • • REMOVER •

This cleaner effectively removes adhesive, asphalt, grease, and tar from a variety of surfaces. Its formula is designed to provide an efficient cleaning solution for a range of applications, ensuring reliable performance without needing too much elbow grease!

RECLAIM CONDITIONER

This conditioner uses enzymes to effectively reclaim and neutralize pit odors. Its formula helps maintain a fresh, clean environment by eliminating unwanted odors in the wash area.

SYNERGY

Polymer Reclaim Products

BioClean[™]

SCENT-FREE

Clean with FORCE. This polymer-based, non-corrosive, reclaim-approved presoak effectively targets dirt and grime on vehicle surfaces. Its advanced formula ensures a haze-free rinse, providing superior performance compared to other reclaim-approved presoaks.

BioShine[™]

SCENT-FREE

This reclaim-approved protectant offers total vehicle protection from water and UV rays, leaving a premium shine. Its advanced formula ensures a haze-free rinse, providing enhanced durability and a noticeable difference in the vehicle's appearance.

BioDry[™]

SCENT-FREE

This reclaim-approved drying agent causes water to bead upon immediate contact, ensuring a complete and thorough drying process. Its advanced formula enhances drying efficiency while leaving a clean, streak-free finish.

BioGlide[™]

SCENT-FREE

This highly concentrated, reclaim-approved lubricating soap helps keep brushes clean while effectively lifting dirt and grime from the vehicle's surface. Its advanced formula ensures extreme haze-free rinsability, providing a clean, smooth finish with every wash.

BioWheel[™]

SCENT-FREE

This highly effective, reclaim-approved, non-corrosive wheel cleaner is designed to be safe for vehicles, customers, and the environment. Its advanced formula ensures thorough cleaning without causing damage, making it a reliable choice for wheel care.
