The Synergy Advantage

The Synergy Advantage is science: Our **ADVANCED POLYMER TECHNOLOGY** makes Synergy Solutions' proprietary formulations perform better, faster and longer lasting than the competition. The difference is visible and lasting.

Advanced Polymer Technology

Traditional products use a two-step approach involving acids and harsh chemicals, which are more expensive and less effective. Our products use one-step polymer technology that traps dirt in a bubble, allowing dirt to be easily rinsed away from your car without using harsh chemicals.

Synergy Solutions manufactures a comprehensive line of car wash chemicals, specializing in polymer-based and non-corrosive products, to achieve superior results using less product.

While commonly corrosive traditional detergents clean by attacking dirt, which can damage the vehicle surface, Synergy Solutions' non-caustic based detergents lift dirt away from the surface using a molecular chain to attract dirt up to the polymer and then encapsulate it, so dirt is not redeposited. The result is easy rinsing leaving a clean and shiny surface.

Made for Car Wash Owners, by Car Wash Owners

Synergy Solutions brings comprehensive capabilities and first-hand experience, to understand every aspect of a car wash operator's challenges and needs.

Experience

Four decades of blending car wash products

Service

Accountable to thousands of car wash operators, including national oil accounts

Ownership

With its own full-service, exterior, touchless automatics, and self-serve car washes, Synergy Solutions is uniquely positioned to realize the car wash operator's day-to-day needs for efficiency, economy, and reliability

Our experience starts from the time we develop the formulation to the time a car rolls off the customer's lot.

SYNERGY

Synergy Advantage

Our Promise: Quality, Reliability, Affordability

We develop all of our proprietary formulations at an on-site laboratory. We test every product batch and retain samples of all shipped products.

All of Synergy Solutions' chemicals are of the highest quality, manufactured to strict quality control standards, so you can be confident of the consistency in every drum we supply.

We offer our product line at extremely competitive pricing, affording the car wash operator the opportunity to **buy the best for less.**

Fast-Drying, Clean, and Shiny Finish

Unlike traditional detergents, which are commonly corrosive and clean by attacking and damaging the vehicle surface, Synergy Solutions' non-corrosive based detergents utilize a molecular chain to attract dirt to the polymer, effectively lifting dirt away from the surface. The dirt is then encapsulated, to allow for easy rinsing, leaving the surface clean and shiny. Our spray protectants and drying agents produce unsurpassed shine and drying capabilities.

SYNERGY

Extreme Pack & Easy-Chem Station

EXTREME PACK™

Synergy Solutions Extreme Pack™: The Most Extreme Concentrate on the Market Today

No Acid Needed, Non-Corrosive, UPS Shippable

Extreme Pack's™ easy-to-store 2.5 gallon containers pack premium cleaning power and unbeatable shine into a compact container.

Dump the Drum. Start Saving.

Space | Store Extreme Pack™ 2.5 gallon containers on a shelf and free up the 55-gallon drum footprint to create a cleaner, more spacious equipment room

Ease of Use | Anyone can easily handle, store and refill the 2.5 gallon containers used with the Extreme Pack Station™ 12.5 gallon reservoir

Costs | Using smaller 2.5 gallon containers translates into savings on shipping, container cost, and blending expenses

EASY TO CONVERT AND INSTALL

Synergy Solutions' Extreme Pack Station™ is simple to maintain, easy to convert to, and simple to install. It includes:

Footvalve that is built into chemical pickup line

One 12.5 gallon reservoir that will hold five 2.5 gallon containers

Each Extreme Pack™ 5 gallon refill pack contains two 2.5 gallon easy-pour containers

Extreme Pack™ Product Line

- PRESOAKS
- LUBRICANTS/DETERGENTS
- PROTECTANTS
- DRYING AGENTS
- TIRE CLEANERS

SYNERGY

Extreme Pack

PRESOAKS

EXTREME PACK™

Viper

One of the most concentrated presoaks on the market. This product can be used in all types of pre-applications and car washes. It has all the benefits of polymer technology, it is non-corrosive and offers incredible rinse-ability

EXTREME PACK™

WildFire

A powerhouse solution engineered for uncompromising cleaning performance. WildFire is specially crafted to obliterate stubborn grime, and contaminates on a vehicles surface. Its formidable alkaline formula guarantees a thorough and efficient cleaning experience, making it an indispensable choice for heavy-duty cleaning needs.

EXTREME PACK™

POWER PREP

Concentrated presoak that contains high-quality low pH acids. Excellently cleans chrome, mirrors, and windshields in a 2-step low pH / high pH process. Great for emulsifying, neutralizing, and loosening dirt and grime in a high-pressure wash system.

EXTREME PACK™

Liquid Blaze

BLUE

RED

Our most concentrated foaming presoak that is visually appealing to customers and adds outstanding rinse-ability. Specifically designed for use in foaming curtains.

EXTREME PACK™

Detail Prep

Hyper concentrated product used in prep guns, either in a tunnel or self-serve car wash. This product comes in bubblegum fragrance.

EXTREME PACK™

Signature

Heavy-duty, high pH, liquid car wash presoak. This workhorse presoak is effective in every application and is especially powerful for touch-free washing. Amazing cleaning ability does not charge the car's surface and increases rinse-ability and shine. Can be used as a single-step presoak or as a two-step process in combination with low pH products.

EXTREME PACK™

UNICORN

PURPLE

RED

YELLOW

The industry's first triple color presoak! Vibrant in color, Unicorn helps provide the deepest of cleans with our advanced polymer technology. Great for use in lava arches, purple color pods and self-serve presoak applications. Paired with spearmint fragrance.

EXTREME PACK™

Berry PolyShine

High concentrate polymeric-based cherry scented protectant maintains and preserves all car surfaces. It provides a protective coating with a high gloss appearance. This product is also great in a self-serve application.

EXTREME PACK™

CLEAR COAT CONDITIONER

You'll enjoy this highly concentrated conditioner. It has excellent eye appeal, with high foaming cleaning properties and sealants.

EXTREME PACK™

GLISTEN

This premium natural wax offers protection and a mirror-like shine. Great to use on line or as an extra service for your customer.

EXTREME PACK™

ECO PREP

Similar to power prep, but more economical and can be used in any low pH application.

LUBRICANTS / DETERGENTS

EXTREME PACK™

Ultra SudZ™

Our highest concentrated detergent that offers three times the concentration of the average detergent. This product offers incredible lubricity to your cloths, and is easily rinsed, leaving the car clean and shiny.

EXTREME PACK™

Foam Brush

An ultra-concentrated foam brush product that offers high lubricity and cleaning agents. This self-serve product comes in various fragrances and colors.

PROTECTANTS

EXTREME PACK™

Aqua Guard

A car wash protectant, formulated for total vehicle protection while you ride. AquaGuard™ repels water, delivers the highest gloss shine possible, and appears as a hand-waxed car finish. Give your customers premium service with long-lasting value.

EXTREME PACK™

Aqua Guard Foaming Protectant

Similar to our premium protectant AquaGuard™, AquaGuard™ Foaming Protectant offers the "show" customers love to see – providing the added foaming and color. AquaGuard™ Foaming Protectant repels water, delivers the highest gloss shine possible, and appears as a hand waxed car finish. Give your customers premium service with long-lasting value.

SYNERGY

Extreme Pack

Rich foaming and concentrated polish that offers high shine and enhanced protection as a flash wax with the desired rinse-ability. This polish is available with color and fragrance.

CERAMICS

Advanced polymer solution adds a layer of protection by chemically bonding to your car's paint, resulting in a durable, shiny, surface that is resistant to stains, oxidation, dirt, and grime for easier cleaning.

EXTREME PACK™

NanoNinja™

Experience the power of NanoNinja, where graphene seamlessly integrates with our cutting-edge Advanced Polymer technology. Revel in a car finish that outshines both ceramic and traditional vehicle protectants, boasting a longer-lasting and more durable shine. NanoNinja takes water resistance to the next level by enhancing the contact angle of water molecules, ensuring effortless drying. Your customers will enjoy the driest shine offered in car washing, setting your service apart from the rest!

EXTREME PACK™

CeramiShield™

Ceramic foaming sealant that adds a layer of protection that bonds to your vehicle's surface. Results include a durable lasting shine, with a silk like feel to the touch.

DRYING AGENTS

EXTREME PACK™

AquaDry™

A super-concentrated drying agent that instantaneously breaks down water to achieve optimum blower efficiency and a drier car. AquaDry reduces labor costs and minimizes wipe downtime.

TIRE / SPECIALTY PRODUCTS

EXTREME PACK™

Brite-N-White™

Non-corrosive wheel and tire cleaner for use in self-serve applications. Brite-N-White is specially designed for air injected foaming systems with green color and fresh pine scent.

EXTREME PACK™

BUG ZAPPER

Advanced polymer technology enables the development of a safe and very effective bug remover. Safely penetrates and softens stubborn bug remains for easy removal.

EXTREME PACK™

CHASSIS PROTECTANT

An concentrated liquid corrosion preventative that is an excellent way to protect the underneath of your vehicle. A concentrated liquid corrosion preventative that is an excellent way to protect the underneath of your vehicle.

SYNERGY Presoaks

Synergy Solutions' Car Wash Presoaks

Engineered Chemistry | Higher quality raw materials are formulated to attack dirt, rather than positively charge the surface of the car. Our solutions eliminate extremely high pH solutions and the need for a low pH product to help neutralize the car surface.

Superior Rinse | Non-reaction car wash presoak does not charge the surface of the car, making rinse-ability more efficient and effortless. Less surface-tension friction allows a cleaner rinse and minimizes spotting.

Cleaner Cars | Our car wash presoaks provides superior cleaning on a variety of materials: painted surface, glass, rubber, chrome, and plastic. In most cases, it is used as a one-step application.

Safe Car Wash Chemistry | Over 95% of our products are classified as non-corrosive and non-caustic. Our car wash chemical technology is designed to attack dirt and road film while leaving the car surface, passengers, and the environment intact.

Economical Car Wash Solutions | With a higher dilution than most products on the market, Synergy Solutions' products yield more productivity and superior results at a lower overall cost to the car wash operator.

FRICITION AND TOUCH-FREE WASHES

Viper™

Our premium polymer presoak that has unmatched single step cleanability. It is safe for every car, the environment, and for your customers. This product can be used in all types of pre-applications and car washes. It has all the benefits of polymer technology, it is non-corrosive and offers incredible rinse-ability.

RED LIGHTNING

Fast acting polymer presoak for cleaning tough dirt. Can be used as a single-step or two-step process in combination with low pH products.

Image Plus

Powerful high pH liquid designed for friction and touch-free washes when cleaning conditions are at their toughest. Image Plus increases rinse-ability and shine while not positively charging the car's surface.

Spectrum™

High pH concentrated presoak. Highly effective for various cleaning environments.

SYNERGY Presoaks

WildFire™

Incredibly powerful, fast-acting, concentrated presoak designed to be used in a single-step or two-step cleaning process.

Cherry Prep

High pH presoak used in high pressure guns or presoak applications. Cherry Prep has high foam and cleaning ability mainly used in self serve applications.

Polymer Plus

High pH concentrated liquid presoak for touch-free cleaning in automatic and tunnel car washes.

Grime-A-Way

Extremely cost-effective, polymer-based, high pH, non-corrosive, presoak with excellent foaming and cleaning properties.

Liquid Blaze

High foaming presoak with red or blue coloring designed specifically for foaming curtains. Used as an added service with great eye appeal and with added rinse-ability.

FORCE

Hard water or no softener? No problem! Clean with confidence with our new hard water presoak with added materials to attack both the hardness of your water and the dirt and grime on the vehicles surface.

SYNERGY

Presoaks

TWO STEP PRODUCTS APPLICATIONS

POWER PREP

This product offers you polymer technology which results in non-corrosive and highly effective low pH product. Great for cleaning windows as part of a two step wash process.

ECO PREP

Similar to power prep, but more economical and can be used in any low pH application.

SELF-SERVE APPLICATIONS

Purple Prep

Foaming presoak for use in self-serve applications with a purple color and a pleasant grape fragrance. Purple Prep quickly cuts through road soils, oils, grime, and bugs.

BLUE POWER

Bubblegum

Fresh Laundry

This premium high pressure detergent concentrate combines high suds, alkalinity, and visual appeal for superior cleaning. It is suitable for tunnel and self-service washes.

Lubricity | Our car wash detergent is formulated to reduce friction between the cloth and car surface.

Does Not Charge the Car's Surface | Which aids the effectiveness of drying agent and waxes.

Superior Rinse | Non-reaction car wash detergent does not charge the surface of the car, making rinse-ability more efficient and effortless. Less surface-tension friction allows a cleaner rinse and minimizes spotting.

High Foam | Offers high visual experience and great customer experience.

Cleaner Cars | Our car wash base detergent provides superior cleaning on a variety of materials: painted surface, glass, rubber, chrome, and plastic. In most cases, it is used as a one-step.

Safe Car Wash Chemistry | Over 95% of our products are classified as non-corrosive and non-caustic. Our car wash chemical technology is designed to attack dirt and road film while safe for the cars surface, passengers and the environment.

Economical Car Wash Solutions | With a higher dilution than most products on the market, Synergy Solutions' products yield more productivity and superior results at a lower overall cost to the car wash operator.

FRICITION APPLICATIONS

Ultra Sudz™

Fresh Laundry

Premium foam lubricating detergent, designed for all cloth washes. Ultra Sudz produces a thick and rich lather and provides excellent cleaning and rinse-ability. This highly concentrated lubricating soap reduces damage claims, such as mirrors, antennas, and license plates.

Crazy Foam

Premium lubricating detergent with ultimate lubricating and cleaning agents for use in friction applications through foamers.

Synergy Shampoo

Fresh Laundry

Synergistically formulated lubricating detergent and cleaning agent for superior cleaning and rinsing, resulting in friction application through foamers.

SoFoam

Fresh Laundry

High foam and high lubricity detergent. Used for high friction applications. Cost effective and offered in various colors and fragrances.

SELF-SERVE APPLICATIONS

Foam Brush

A lubricant detergent with cleaning agents for use in self-service brush applications. Available in multiple colors and fragrances.

Bubbly Brush

Concentrated lubricant detergent with cleaning agents for use in self-service brush application. Available in multiple colors and fragrances.

Winter Foam Brush

Lubricating detergent with cleaning agents and anti-freeze protections for use in self-service applications in sub-freezing conditions. Available in pink with cherry scent, blue with bubblegum scent, and yellow with banana scent.

Exceptional Shine | Our new technology delivers a superior car wash protectant. The shine is so deep; it really looks as if it were hand waxed.

Breaks and Beads | Get the best of both worlds: products with a fast beading action to promote sheeting before the car reaches the dryer, and reduced beading at the end to allow the dryer to remove water more efficiently.

Superior Rinse | Non-reaction car wash drying agents do not charge the surface of the car, making rinse-ability more efficient and effortless. Less surface-tension friction allows a cleaner rinse and minimizes spotting.

Economical Car Wash Solutions | With a higher dilution than most products on the market, Synergy Solutions' products yield more productivity and superior results at a lower overall cost to the car wash operator.

PROTECTANTS

A car wash protectant, formulated for total vehicle protection while you ride. AquaGuard™ repels water, delivers the highest gloss shine possible, and appears as a hand-waxed car finish. Give your customers premium service with long-lasting value.

GLISTEN

This premium natural wax offers protection and a mirror-like shine. Great to use on line or as an extra service for your customer.

Vanilla scented premium sealer with high beading and fast breaking technology which accelerates drying. This product leaves your car with an incredible shine.

CERAMICS

Advanced polymer solution adds a layer of protection by chemically bonding to your car's paint, resulting in a durable, shiny, surface that is resistant to stains, oxidation, dirt, and grime for easier cleaning.

CeramiShield™

Ceramic sealant that adds a layer of protection that bonds to your vehicle's surface. Results include a durable lasting shine, with a silk like feel to the touch.

**Fresh
Sensation**

A fresh scented premium sealer. Fresh Sensation's high beading and fast-breaking technology accelerates drying. It's fresh scent adds to customer appeal and leaves a beautiful shine on your vehicle.

**BLUE
SENSATION**

A self-service protectant that offers a deep blue, scented, sudsing protectant. It has a great visual appeal for the customer. Formulated to provide a long-lasting, visible, water-resistant, high gloss appearance on all surfaces.

**Cherry
PolyShine**

Polymer-based, cherry-scented, protectant designed to maintain and preserve all car surfaces. Provides a visibly high gloss appearance and a protective coating. Also great in a self-serve application.

DRYING AGENTS**AquaDry™**

A super-concentrated drying agent that instantaneously breaks down water to achieve optimum blower efficiency and a drier car. AquaDry reduces labor costs and minimizes wipe downtime.

**Bead
Away**

Allows water on the surface of the car to lift and separate, which permits the blower to more efficiently bead water off the car.

PolyShine

Polymeric based protectant designed to maintain and preserve all car surfaces. PolyShine provides a high visible gloss appearance while providing the surface with a protective coating. This product can also be used as a drying agent.

SYNERGY **Drying Agents/Protectants**

TRI-COLORED FOAMING PRODUCT

Same protection as AquaGuard™ with added foaming benefits. Offers visual appeal with foaming colors of red, blue and yellow and a pleasing fragrance. Excellent rinsing properties enhance gloss and drying capabilities.

Rich foaming and concentrated polish that offers high shine and enhanced protection as a flash wax with the desired rinse-ability. This polish is available with color and fragrance.

Combination of cleaning agents and polymeric silicones to enhance gloss and drying capabilities. Applied through foamers and available in vibrant pink, yellow, and blue with fragrance.

PH-balanced surface conditioner, with cleaning agents available in pink, blue, and yellow with fragrance. This product is applied through foamers.

SYNERGY

Wheel/Tire Cleaners

Cleaning Ability | Highly effective in cleaning all types of wheel and tire surfaces.

Superior Rinse | Non-reaction car wash wheel / tire cleaners do not charge the surface of the car, making rinse-ability more efficient and effortless. Less surface-tension friction allows a cleaner rinse and minimizes spotting.

Economical Car Wash Solutions | With a higher dilution than most products on the market, Synergy Solutions' products yield more productivity and superior results at a lower overall cost to the car wash operator.

Brite-N-White™

Non-corrosive wheel-tire cleaner for use in self-serve applications. Brite-n-White is specially designed for air-injected foaming systems with green color and fresh pine scent.

RED SNAPPER™

Highly concentrated, non-corrosive product for cleaning all types of wheels (including chrome, aluminum, and magnesium) and whitewall tires. Safely removes brake dust and makes whitewalls white again. Simply spray on and rinse off.

WHEELIE KLEEN

A non-corrosive and economical wheel cleaner that is safe and highly effective. A non-corrosive and economical wheel cleaner that is safe and highly effective.

Krystal Kleen

A polymer wheel cleaner that is non-corrosive. This product offers you a safe way to clean the car's wheels without damage and yields excellent results.

SYNERGY Specialty Products

Icee Blue™

A premium water-based silicone suspension dressing, formulated to perform like a solvent-based dressing. Optimum usage with an in line applicator, Icee Blue's high gloss durability combined with its superior water-repellant properties makes it ideal for inside and outside vehicles.

GLACIER

An economical water-based silicone suspension dressing, formulated to perform like a solvent based dressing. Applications preform well for inside and outside vehicles.

POLYMER BAY & WALL

Excellent alternative to hydrofluoric acid. It is safe and highly effective. With a little bit of elbow grease, it offers the same results as the harsher acid products on the market but with the added benefit of being non-corrosive.

Bay and Wall Cleaner

Heavy-duty cleaner that contains a hydrofluoric acid blend.

POLYMER BUG REMOVER

Advanced polymer technology enables the development of a safe and very effective bug remover. Safely penetrates and softens stubborn bug remains for easy removal.

BUG ZAPPER

This product is similar to polymer bug remover but is at a higher concentration.

CHASSIS PROTECTANT

A concentrated liquid corrosion preventative that is an excellent way to protect the underneath of your vehicle.

GLASS CLEANER

Premium glass cleaner that is specially formulated to clean automobile windshields for use in tunnel applications. This cleaner has a dilution ratio up to 30:1.

InFused™

Custom liquid water-based scents available. Leaves vehicle interiors with a fresh, clean and pleasant fragrance.

LIQUID LAUNDRY DETERGENT

Great for cleaning highly spoiled articles in commercial or residential washing machines.

All Purpose Cleaner

Multi-purpose cleaner delivers exceptional performance and value. Formulated to clean dirt, oil, grease, and grime from hard surfaces including plastic, vinyl, and engines.

• TAR & ADHESIVE • • REMOVER •

An extremely safe and effective cleaner that removes adhesive, asphalt, grease, and tar yet is safe for use on virtually any surface.

RECLAIM CONDITIONER

Reclaims pit aromas using enzymes. Excellent way to eliminate odors in your car wash.

BioClean

Clean with FORCE. Our polymer based, non-corrosive reclaim approved presoak attacks the dirt and grime on the vehicles surface with a haze-free rinse like no other reclaim approved presoak on the market.

•Volume: 5, 15, 30, 55 gal

BioShine

Your customers will notice the difference with this Reclaim approved protectant formulated for total vehicle protection from water and UV rays with a haze-free rinse and premium shine.

•Volume: 5, 15, 30, 55 gal

BioDry

Reclaim approved drying agent that causes water to bead upon immediate contact for a complete and thorough drying process..

•Volume: 5, 15, 30, 55 gal

BioGlide

This highly concentrated reclaim approved lubricating soap keeps your brushes clean and works to lift dirt and grime from the vehicles surface with an extreme haze-free rinse-ability.

•Volume: 5, 15, 30, 55 gal

BioWheel

Highly effective reclaim approved non-corrosive wheel cleaner that is safe for cars, your customers and the environment.

•Volume: 5, 15, 30, 55 gal
